

The Canadian Lung Association encourages you to

SHOW YOUR LUNGS

some love

Getting your recommended vaccines is a great way to show your lungs some love – and help protect the millions of Canadians living with lung disease who are at risk of serious illness from flu, COVID-19, pneumonia and respiratory syncytial virus (RSV).

Talk to your family doctor, nurse practitioner or pharmacist about which vaccines are right for you.

VACCINATION TRACKER

2023-2024

Bring this sheet with you when speaking to your family doctor, nurse practitioner or pharmacist. Use it to record which vaccinations are recommended for you, to remind yourself to make an appointment to get vaccinated, and to keep track of when you received each vaccination.

YOUR NAME		
VACCINE	RECOMMENDED? (CIRCLE ONE)	DATE RECEIVED
Influenza vaccine (flu shot)	YES NO	
COVID-19 booster	YES NO	
Pneumococcal (pneumonia) vaccine	YES NO	
Respiratory syncytial virus (RSV) vaccine	YES NO	

If you, or someone you have frequent contact with, is high risk for serious illness, it is even more important to get the vaccines that are recommended for you. To find out more about who is at high risk, visit lung.ca/vaccinations or speak to your healthcare provider.

Made possible by unrestricted funding from Pfizer Canada and Sanofi

This document provides basic information only. It is not intended to provide or take the place of medical advice, diagnosis or treatment. Always discuss the benefits and risks of any vaccine with your family doctor, nurse practitioner or pharmacist. This document is NOT and should not be used as an official vaccination record.
